Installation of Mojave with Ozmosis using HD 4600

Beitrag von „ammoune78“ vom 18. Januar 2019, 00:08

You can simply go to [bios settings](#), and load "Mojave USB" under Override submenu, this will have to be at each time you started or restarted your macOS Mojave. As far as i know, this is a permanent solution, thanks to [kuckkuck](#)
