

Kurzanleitung: High Sierra, Mojave ,Catalina, BigSur und Ventura auf ASUS Zenbook UX330UAK

Beitrag von „anonymous_writer“ vom 30. Januar 2019, 16:36

Hello [mouthbow](#) ,

you need for my EFI Mojave.

<http://osxdaily.com/2018/09/26...ojave-boot-usb-installer/>

You can copy my EFI folder to a second USB-stick in FAT-32 format and then start from this stick.

Mojave-Installation stick must not be changed. Simply plug it into the second USB port as a second stick.
