

Kurzanleitung: High Sierra, Mojave ,Catalina, BigSur und Ventura auf ASUS Zenbook UX330UAK

Beitrag von „mouthbow“ vom 1. Februar 2019, 00:03

Hi! Many thanks for your response!

So! You are telling me that your EFI is for Mojave?? I thought it was for High Sierra and using your config.plist nothing worked, not video, keyboard...

So you are telling me that your EFI folder with a Mojave installer and posterior installation has to work everything directly with no patching??

Probably Im going to try before your answer but any other help will be really appreciated.

PD: I don't really understand what do you mean with second stick, and second usb port...
