

MacOS effort for Xiaomi Mi Notebook & Gaming laptop series

Beitrag von „influenist“ vom 8. März 2019, 02:19

Hi guys. The build is updated to Mojave and now comes with base clock speed of 600mhz under low loads (~6 hours of battery life). Also support for i5 7y54 has been added. Also added @CMMChris mention regarding the internet installer. Please check the repo on Github or let me know in case you run into an issue.
