HILFE: Statt 242 GB nur 71 GB frei für neue Partition !?!

Beitrag von „iPhoneTruth“ vom 3. Juni 2019, 15:14

Grad probiert. Terminal gibt diesen Fehler aus:

"Started APFS operation

Aligning shrink delta to 131.900.436.480 bytes and targeting a new physical store size of 379.999.997.952 bytes

Determined the minimum size for the targeted physical store of this APFS Container to be 440.871.682.048 bytes

Error: -69521: Your APFS Container resize request is below the APFS-system-imposed minimal container size (perhaps caused by APFS Snapshot usage by Time Machine)"
