Intel HD 4400 (Desktop Version) Clover

Beitrag von „antonyo“ vom 5. Juni 2019, 06:56

Hello,

Even if it has passed long time, I hope that someone can help me.

I have a Lenovo all in one C460

I3 4130t

Intel HD 4400

I don't know the motherboard model.

I tried with El Capitan and with High Sierra but for Intel HD4400 I get always 7mb.

I put IntelGFX 0x0412, ig-platform-id 0x0d220003 e Inject Intel= true

In the directory \ EFI \ Clover \ kexts \ Other:

- FakePCIID_Intel_HD_Graphics.kext

- FakePCIID.kext

I also tried to install the two kext in S/L/E.

With IntelGFX 0x04128086 it stops on the boot.

Thanks
