Suche passenden Laptop für Hackbook

Beitrag von „EaseYourPain“ vom 27. Juni 2019, 18:15

[grt](#) vielleicht fällt dir da ja was auf! 😊

"To do :

1/ Disable "Secure Rollback Prevention" !!!!

in Bios menu (restarting Windows 10 and strike F1 when your screen is black).

2/ Restart Windows and Download the 2.36 UEFI Bios for x240 package from :

3/ Install it and choose "Exit" when the error message is displayed

4/ Open a cmd terminal (C:\Windows\System32, find cmd.exe, right clic and "Run as administrator") then type (or copy/paste):

```
C:\DRIVERS\FLASH\giuj23us\WinFlash64.exe /sd /file  
C:\DRIVERS\FLASH\giuj23us\GIET86WW\01DE000.FL1
```

and voilà !"
