## **Lilu/WhateverGreen and Ozmosis - Graphics in Mojave**

**Beitrag von „jboeren“ vom 9. August 2019, 09:50**

Thanks!

Do you have please complete your profile with your hardware setup? It makes the people much easier to help you!

Do have your internal graphics enabled too? It's important to get it working! As far as I know you can use lilu and whatevergreen in Oz!
