

Erledigt AMD RX580

Beitrag von „HarryH“ vom 20. August 2019, 18:41

... das sieht man bei Autodesk anders:

... Are you running the application on an Apple certified configuration or on a hybrid configuration (Hackintosh)?

About the Resource Manager, the fact that your workstation runs on a non-supported OS makes Flame unable to manage the RAM and VRAM adequately on your workstation (no resource management).
