KextUpdater läuft unter Mojave nicht

Beitrag von „HDRI“ vom 26. August 2019, 12:11

Ich habe auch Schwierigkeiten mit dem Kext Updater Update.

Das liegt bei mir aber nicht an einem OS update, sondern auch an der Invalid code signature bei Version 3.0.3.

Großartiges tool, btw (Sascha_77 - Superheld Badge).

grabbed and installed - Kextupdater 3.0.3
