HP 250 g7 stucks bevor installer

Beitrag von „al6042“ vom 8. September 2019, 11:51

Hi [Rem_Galleu](#)

I have to close this thread, since we are not supporting and allow threads of Hackintosh setups installed with [Distros](#) like your mentioned product.

Please try an vanilla approach to install macOS on your rig and then rephrase the question, if you still have problems.
