Conexant CX20632 Audio läuft nicht unter Mojave

Beitrag von „attend“ vom 2. November 2019, 20:28

Hi MacPeet,

Thank your so much for your help. I'm glad to say that all output devices are working properly when I'm using layout16.

However the Mic still got problem. I tried both layout15 and layout16. None of front and rear Mic works. I've also attached some screenshots of output/input devices. The outputs are perfect.
