System Integrity Protection status: unknown (Custom Configuration).

Configuration:
  Apple Internal: enabled
  Kext Signing: disabled
  Filesystem Protections: disabled
  Debugging Restrictions: disabled
  DTrace Restrictions: disabled
  NVMM Protections: disabled
  BaseSystem Verification: enabled

This is an unsupported configuration, likely to break in the future and leave yo
ur machine in an unknown state.

```

also die Feinheiten und für mich persönlich auch viel verständlicher in der Praxis. 😊
