Lasst uns basteln: Vorke Notebook 15 (i5-8250U)

Beitrag von „CMMChris“ vom 30. November 2019, 11:28

My machine went up in smoke. I am currently waiting for my replacement unit. After I got it I will finish building a fully working Clover config for it. The machine is fully upgradable including the network card. Already have bought a Dell DW1820A to test it. Once I got my replacement unit I will give it a shot.
