Hi [maximus1007](#) ,

you are right - i have this Headphone-Issue as well! Did not notice it to be honest because i use Bluetooth Headphones.

Have to investigate further, but honestly i don't think i'll be able to invest much time in it, sorry. You might also try and use a mini-usb--audio dongle if you really rely on it.

From the things I read the last few minutes regarding this problem, it has something to do with our sound chip - and AppleALC does not really support it fully.

cheers
