## End RandomSeed +++++... stucks.... fast help pls

Beitrag von „Pascalmeyer8“ vom 25. Dezember 2019, 22:26

Hey there,

I am new here and want MacOS on my PC. I have never done it before and have much problems with it.

I ve tried very much but with no access. It always stuck at *End RandomSeed* +++++.

In the last attempt I used the Efi folder below and tried to install macOS Mojave 14.6.06. It would be grateful if you send me a working EFI Folder..

Please Help me.

You can see my configs left and the bios is set to f50 - the latest version.

Thank you very much. 🙏🙏
