What happend to some bioses?

Beitrag von „griven“ vom 8. April 2020, 15:22

We decided to deactivate the category since all Z1XX Roms have to be considered as highly experimental. Most of the posted Z17XX Roms didn't even work or at least led to undefined and unwanted behavior. In case you need a particular ROM from the now deactivated category feel free to send me a private message and I'll provide you the needed Rom.

Please be aware that I will only provide you the last state which was former accessible without any warranty and without any claim of support.
