Erledigt Catalina auf XMG A705 (Clevo N170SD) OpenCore

Beitrag von „kemalsans" vom 19. Mai 2020, 04:48

Well hello,

first of all I'm sorry for writing in English but, while I searching my laptop brand I found your topic.

I have same laptop with different brand, sadly I couldn't do any ssdt patches for it.

I am looking for fully working hd4600 config, mine is not bad but have some issues

-hdmi output not working

-sadly brightness not working

+dp output works but sound is not working

+have no glitches while working(because some configs are not working well at all time)

also I found Kext for touchpad, I hope it helps

Abra a7 v6 is equal to your laptop model,

after using given platform id, my hdmi and dp ports are works flawlessly. Now I am trying to fix sound with hdmi @jullian91 you're hero
