Top 10 Hackintosh Laptops 2015

Beitrag von „varunsharma960“ vom 7. Juni 2020, 10:05

Running on the latest Windows 10 operating system, this laptop can be used as a multipurpose laptop as well. It sports a 15.6-inch Full HD IPS display, which doesn't strain eyes even after a very prolonged gaming session. Powered by the 9th Gen Coffee Lake series of processors from Intel, the HP Pavilion 15 houses an 8GB of RAM with a 4GB discrete Nvidia GeForce GTX 1650 graphics card. Storage department on this budget gaming laptop is also well-managed with 256GB of SSD which is small, but it's SSD so performance wise its great and you can put another drive inside if you want more storage capacity. Overall, considering its price tag of [Laptop under \\$800](#), it is a pretty well-specced machine.
