

# Hp 2170p "Treiber" Probleme

**Beitrag von „Panzli“ vom 25. Juni 2020, 19:34**

Bootable macOS installer creation failed because the process failed to copy some elements on it, mainly the installer app or it's content, can't be copied or failed to be copied, please check that your target driver is working properly and just in case erase it with disk utility, if that does not work, use another working target device

Das ist die genaue Fehlermeldung
