

# OpenCore Sammelthread (Hilfe und Diskussion)

Beitrag von „bumbuy“ vom 3. Juli 2020, 08:23

Würde so aussehen:

The screenshot shows a macOS System Information window with the 'OpenCore' section expanded. It displays a list of boot parameters and their values. The parameters are organized into sections: 'Kernel', 'Add', 'Boot', 'Platform', and 'Misc'. The values are displayed in a dark-themed window with a light gray background for the text.

|                |            |                        |
|----------------|------------|------------------------|
| Kernel         | Dictionary | 7 Schlüssel-Wert-Paare |
| Add            | Array      | 9 geordnete Elemente   |
| 0              | Dictionary | 7 Schlüssel-Wert-Paare |
| 1              | Dictionary | 7 Schlüssel-Wert-Paare |
| 2              | Dictionary | 7 Schlüssel-Wert-Paare |
| 3              | Dictionary | 7 Schlüssel-Wert-Paare |
| 4              | Dictionary | 7 Schlüssel-Wert-Paare |
| 5              | Dictionary | 7 Schlüssel-Wert-Paare |
| BundlePath     | String     | USBPorts.kext          |
| Comment        | String     |                        |
| Enabled        | Boolean    | YES                    |
