Hello Peppe8,

just look at page one, there is an EFI dated 01.01. to be used as a start.

thanks, I tried it but some stuff is not working properly, ,maybe fixed later or not; and I do not understand german 🤔

not working stuff:

1. trackpad
2. fingerprint (I think there is no solution on that)
3. IGPU not working properly..everything is slow and I cannot set resolution of the screen
4. sound
