El Capitan auf dem T61? Ja aber sicher doch!

Beitrag von „kay2wild“ vom 24. Juli 2020, 22:48

The

[Zitat von g-force](#)

This is the thread: [El Capitan on the T61? Yes, but definitely!](#)

Structure is "EFI / EFI / CLOVER", so i called it the EFI (in fact it's Clover without folder EFI).

I used the EFI provided by g-force but still, Black screen with the plus signs. Mind you I dont have any pre-exisiting Mac OS on the T61, that shouldnt matter right?

All i did was use Disk Creator, then Clover r5120 to create the bootloader, than I replace my EFI with the one provided by [g-force](#)
