

acidanthera VirtualSMC (Wird zum Boot benötigt)

Post by “NoirOSX” of Aug 3rd 2020, 5:12 pm

v1.1.5

- Improved CHLC key value reporting
- Fixed B0PS and B0St key size to resolve broken fully charged state
- Fixed sometimes stuck battery update thx to [@zhen-zen](#)
- Added workaround for kBRemainingCapacityCmd exceeding kBFullChargeCapacityCmd
- Added preliminary 11.0 support
- Fixed SMCPProcessor model detection warning
- Fixed legacy smc tool value calculation
- Fixed running smc read on 11.0 without IOKit framework
- Added a new plugin SMCDellSensors for Temp/FAN monitor/control
- Added basic SMCBatteryManager compatibility with 11.0
- Fixed crashes when trying to read CLKT key
