Erledigt [GUIDE] OpenCore Update mit Kext Updater und OCConfigCompare + Config Tweaks

Beitrag von „5T33Z0" vom 7. Oktober 2020, 23:41

UPDATE::: Sample.plist differences/changes between OC Releases

GREEN = added Item

BLUE = moved Item

RED = deleted/replaced/renamed Item

###

OC Config Compare

Sample.plist Changes from OC 0.6.7 to 0.6. (WIP)

###

Checking for values missing from User plist:

Sample_068.plist -> Booter -> Quirks - Missing Key: ForceBooterSignature

>> Actions when updating from v 0.6.7 to 0.6.8:

• **Copy green entries from v067 sample.plist to config.plist**

###

OC Config Compare

Sample.plist Changes from OC 0.6.6 to 0.6.7

###

Checking for values missing from User plist:

Sample_066.plist -> UEFI -> Audio - Missing Key: ResetTrafficClass

Sample_066.plist -> UEFI -> Output - Missing Key: GopPassThrough

Sample_066.plist -> UEFI -> Quirks - Missing Key: ActivateHpetSupport

Checking for values missing from Sample:

Sample_067.plist -> UEFI -> Input - Missing Key: KeyMergeThreshold

>> Actions when updating from v 0.6.6 to 0.6.7:

• **Copy green entries from v067 sample.plist to config.plist**

• **Delete red entries from config.plist**

##

OC Config Compare

Sample.plist Changes from OC 0.6.5 to 0.6.6

##

Checking for values missing from User plist:

Sample_065.plist -> Kernel -> Quirks - Missing Key: SetApfsTrimTimeout

Sample_065.plist -> Misc -> Boot - Missing Key: LauncherOption

Sample_065.plist -> Misc -> Boot - Missing Key: LauncherPath

Sample_065.plist -> PlatformInfo - Missing Key: UseRawUuidEncoding

Sample_065.plist -> PlatformInfo -> Generic - Missing Key: MaxBIOSVersion

Sample_065.plist -> UEFI -> Quirks - Missing Key: DisableSecurityPolicy

Sample_066.plist -> Misc -> Security - Missing Key: BootProtect

>> **Actions:**

• Copy green entries from sample.plist to user config.plist when updating from v 0.6.5 to 0.6.6.

• Delete BootProtect entry from your config.plist
