

# Nach Update von 0.59 auf 0.62 kein Boot mehr möglich

Beitrag von „5T33Z0“ vom 14. Oktober 2020, 12:01

Mit welcher config soll dein Rechner denn starten? Mit config.plist oder mit my-config.plist.

Falls letzteres, dann umbenennen in config.plist und die plist auf den neusten Stand bringen, da da Sachen hinzugekommen sind seit 0.5.9:

```
#####
```

```
# OC Config Compare #
```

```
#####
```

Checking for values missing from User plist:

my-config.plist -> Booter -> Quirks - Missing Key: ProvideMaxSlide

my-config.plist -> DeviceProperties -> Add - Missing Key: PciRoot(0x0)/Pci(0x1b,0x0)

my-config.plist -> Kernel - Missing Key: Force

my-config.plist -> Kernel - Missing Key: Scheme

my-config.plist -> Kernel -> Add -> Array - Missing Key: Arch

my-config.plist -> Kernel -> Emulate - Missing Key: DummyPowerManagement

my-config.plist -> Kernel -> Emulate - Missing Key: Cpuid1Data

my-config.plist -> Kernel -> Emulate - Missing Key: Cpuid1Mask

my-config.plist -> Kernel -> Emulate - Missing Key: MaxKernel

my-config.plist -> Kernel -> Emulate - Missing Key: MinKernel

my-config.plist -> Kernel -> Quirks - Missing Key: DisableLinkeditJettison  
my-config.plist -> Kernel -> Quirks - Missing Key: ExtendBTFeatureFlags  
my-config.plist -> Kernel -> Quirks - Missing Key: LegacyCommpage  
my-config.plist -> Misc -> Debug - Missing Key: SerialInit  
my-config.plist -> Misc -> Security - Missing Key: ApECID  
my-config.plist -> Misc -> Security - Missing Key: DmgLoading  
my-config.plist -> Misc -> Security - Missing Key: EnablePassword  
my-config.plist -> Misc -> Security - Missing Key: PasswordHash  
my-config.plist -> Misc -> Security - Missing Key: PasswordSalt  
my-config.plist -> Misc -> Security - Missing Key: SecureBootModel  
my-config.plist -> NVRAM -> Add -> 7C436110-AB2A-4BBB-A880-FE41995C9F82 - Missing Key: run-efi-updater  
my-config.plist -> PlatformInfo -> Generic - Missing Key: SystemMemoryStatus  
my-config.plist -> PlatformInfo -> Generic - Missing Key: ProcessorType  
my-config.plist -> UEFI -> APFS - Missing Key: GlobalConnect  
my-config.plist -> UEFI -> Output - Missing Key: UgaPassThrough  
my-config.plist -> UEFI -> ProtocolOverrides - Missing Key: AppleFramebufferInfo  
my-config.plist -> UEFI -> ProtocolOverrides - Missing Key: AppleImg4Verification  
my-config.plist -> UEFI -> ProtocolOverrides - Missing Key: AppleSecureBoot  
my-config.plist -> UEFI -> ReservedMemory -> Array - Missing Key: Type

Checking for values missing from Sample:

Sample.plist -> Kernel -> Quirks - Missing Key: DummyPowerManagement  
Sample.plist -> Misc -> Security - Missing Key: BlacklistAppleUpdate
