

Asus X299 Deluxe II mit zweimal Vega

Beitrag von „MacGrummel“ vom 4. November 2020, 00:46

Irgendwie bekomme ich die Einstellungen heute wohl nicht hin: obwohl ich so weit wie möglich nach den [X299er Vorgaben](#) (alle Einstellungen gibt es eben nicht in jedem BIOS) vorgegangen bin und meine alte EFI versuche, weiter zu nutzen, lande ich ständig bei dem gleichen ACPI-Error.

Irgendwas übersehe ich schon wieder, egal, wie die CPU eingestellt ist, egal, ob CSM oder nicht..
