

OSX Catalina - Realtek ALC274 kein Sound

Beitrag von „prayer“ vom 2. Januar 2021, 00:08

Danke für deine Mühe.

Ich habe mich schon etwas über OpenCore belesen, da ich gern auch auf BigSur updaten würde.

Kann mein Ton Problem mit den "invalid signature" Kext zusammenhängen ?

The screenshot shows the Hackintool v3.4.9 interface. The top menu bar includes System, Patch, Boot, NVRAM, Extensions, Displays, Sound, USB, Disks, PCIe, Power, Calc, Utilities, and Logs. The 'Utilities' window is active, displaying a list of kexts in the left pane and a terminal window in the right pane. The terminal shows the following output:

```
kextcache -i /
KernelCache ID: 4A801F44E4A3EAB6085130AE10556E2
kextcache -i /
kextcache -arch x86_64 -local-root -all-loaded -kernel /System/Library/Kernels/kernel -prelinked-kernel /Library/Apple/System/Library/PrelinkedKernels/prelinkedkernel -volume-root / /Library/Extensions /AppleInternal/Library/Extensions /Library/Apple
kext with invalid signature (-67854) allowed: <OSKext 8x7F5825288a0 [8x7fff8b128cc0]> { URL = "file:///System/Library/Extensions/AppleHDA.kext/", ID = "com.apple.driver.AppleHDA" }
kext with invalid signature (-67854) allowed: <OSKext 8x7F944c6a56f0 [8x7fff8b128cc0]> { URL = "file:///System/Library/Extensions/AppleHDA.kext/", ID = "com.apple.driver.AppleHDA" }
$
```
