

# Clover r5125 ff. und die Quirks

Beitrag von „anonymous\_writer“ vom 11. Januar 2021, 12:34

Das ist die eigentliche Fehlermeldung. Auch hier wäre die Frage, startest du über das Preboot Volumen?

```
panic(cpu, 0) at kernel/kern.c:1000: Panic: the file(s) of a needed volume is not allowed on a RELEASE build of iOS
panic(cpu, 0) at kernel/kern.c:1000: Panic: the file(s) of a needed volume is not allowed on a RELEASE build of iOS
panic(cpu, 0) at kernel/kern.c:1000: Panic: the file(s) of a needed volume is not allowed on a RELEASE build of iOS
panic(cpu, 0) at kernel/kern.c:1000: Panic: the file(s) of a needed volume is not allowed on a RELEASE build of iOS
