

OpenCore Sammelthread (Hilfe und Diskussion)

Beitrag von „cobanramo“ vom 12. Januar 2021, 14:45

[StevePeter](#) & [bumbuy](#)

Da ist mir auch ein kleiner Fehler unterlaufen, da ich Nighly Version einsetze ist das bei mir untergegangen zu erwähnen.

Bedenkt einfach das die Background erst ab 0.6.6 läuft aber die Icon Geschichte schon im 0.6.5 vorhanden ist...

-
- v0.6.6**
- Added keyboard and pointer entry scroll support in OpenCanopy
 - Added background image support in OpenCanopy
 - Fixed selector boot option choice in OpenCanopy
 - Refined selector dimensions for OpenCanopy
 - Add Real200series option to kexts.kc
 - Fix MLB verification feature in macorecovery
- v0.6.5**
- Fixed installing OpenDuet on protected volumes
 - Updated underlying EDK II package to edk2-stable202011
 - Updated builtin firmware versions for SMBIOS and the rest
 - Fixed macorecovery server protocol compatibility
 - Added basic audio assistant support in OpenCanopy
 - Added compiled ACPI samples to the package
 - Fixed timer resolution restoration at boot time
 - Fixed memory capacity when using custom SMBIOS memory config
 - Removed no longer required `!sleep!locate!be!t!r!er!` quirk
 - Fixed macserial crashes when processing invalid serials
 - Fixed macserial issues when processing 2021 year serials
 - Added advanced error checking in ocsuldata utility
 - Added `!sleep!erlay!` to configure audio setup delay
 - Reworked `!sleep!erlay!` command to support older macOS
 - Implemented MP3 audio decoding for audio assistant support
 - Added support for `!sleep!erlay!` for more theme variants
 - Added `!sleep!erlay!` for Time Machine
 - Fixed OpenLibRtc compatibility with certain keyboards

Gruss Coban
