

T420 mit High Sierra und Clover

Beitrag von „5T33Z0“ vom 4. Februar 2021, 01:36

Wundert mich jetzt nicht sonderlich, dass die Config von TLuck nicht funktioniert:

Code

```
1. #####
2. # OC Config Compare #
3. #####
4.
5. Checking for values missing from User plist:
6.
7. config.plist -> Booter - Missing Key: Patch
8. config.plist -> Booter -> Quirks - Missing Key: AllowRelocationBlock
9. config.plist -> Booter -> Quirks - Missing Key: ProvideMaxSlide
10. config.plist -> DeviceProperties -> Add - Missing Key: PciRoot(0x0)/Pci(0x1b,0x0)
11. config.plist -> Kernel - Missing Key: Force
12. config.plist -> Kernel - Missing Key: Scheme
13. config.plist -> Kernel -> Add -> Array - Missing Key: Arch
14. config.plist -> Kernel -> Block -> Array - Missing Key: Arch
15. config.plist -> Kernel -> Emulate - Missing Key: DummyPowerManagement
16. config.plist -> Kernel -> Emulate - Missing Key: MaxKernel
17. config.plist -> Kernel -> Emulate - Missing Key: MinKernel
18. config.plist -> Kernel -> Patch -> Array - Missing Key: Arch
19. config.plist -> Kernel -> Quirks - Missing Key: DisableLinkeditJettison
20. config.plist -> Kernel -> Quirks - Missing Key: ExtendBTFeatureFlags
21. config.plist -> Kernel -> Quirks - Missing Key: ForceSecureBootScheme
22. config.plist -> Kernel -> Quirks - Missing Key: LegacyCommpage
23. config.plist -> Misc -> Boot - Missing Key: PickerVariant
24. config.plist -> Misc -> Debug - Missing Key: SerialInit
25. config.plist -> Misc -> Debug - Missing Key: SysReport
26. config.plist -> Misc -> Security - Missing Key: ApECID
27. config.plist -> Misc -> Security - Missing Key: BlacklistAppleUpdate
28. config.plist -> Misc -> Security - Missing Key: DmgLoading
29. config.plist -> Misc -> Security - Missing Key: EnablePassword
30. config.plist -> Misc -> Security - Missing Key: PasswordHash
31. config.plist -> Misc -> Security - Missing Key: PasswordSalt
32. config.plist -> Misc -> Tools -> Array - Missing Key: RealPath
33. config.plist -> Misc -> Tools -> Array - Missing Key: TextMode
```

34. config.plist -> NVRAM -> Add - Missing Key: 4D1FDA02-38C7-4A6A-9CC6-4BCCA8B30102
35. config.plist -> NVRAM -> Add -> 7C436110-AB2A-4BBB-A880-FE41995C9F82 - Missing Key: run-efi-updater
36. config.plist -> NVRAM -> Delete - Missing Key: 4D1FDA02-38C7-4A6A-9CC6-4BCCA8B30102
37. config.plist -> PlatformInfo - Missing Key: CustomMemory
38. config.plist -> PlatformInfo -> Generic - Missing Key: ProcessorType
39. config.plist -> PlatformInfo -> Generic - Missing Key: SystemMemoryStatus
40. config.plist -> UEFI -> APFS - Missing Key: GlobalConnect
41. config.plist -> UEFI -> Audio - Missing Key: SetupDelay
42. config.plist -> UEFI -> Output - Missing Key: ForceResolution
43. config.plist -> UEFI -> Output - Missing Key: UgaPassThrough
44. config.plist -> UEFI -> ProtocolOverrides - Missing Key: AppleFramebufferInfo
45. config.plist -> UEFI -> ProtocolOverrides - Missing Key: AppleImg4Verification
46. config.plist -> UEFI -> ProtocolOverrides - Missing Key: AppleSecureBoot
47. config.plist -> UEFI -> Quirks - Missing Key: TscSyncTimeout
48. config.plist -> UEFI -> ReservedMemory -> Array - Missing Key: Type
- 49.
50. Checking for values missing from Sample:
- 51.
52. Sample.plist -> DeviceProperties -> Add - Missing Key: PciRoot(0x0)/Pci(0x1B,0x0)
53. Sample.plist -> DeviceProperties -> Add - Missing Key: PciRoot(0x0)/Pci(0x2,0x0)
- 54.
55. Press [enter] to return...
