Hi friend,

For a couple of weeks, I have been trying to make a hackintosh like yours, I have a laptop with the same model and specifications like yours, however I have not been

successful.

I have tried it with opencore and clover and have not been successful.

Could you give me some advice to get it?

Also download a guide from the github page, I followed the whole procedure but

nothing.

I do not know what I'm doing wrong.

Any comments or any help would be greatly appreciated.

Thank you very much.
