{Gelöst} Installer hängt bei jeder Menge ++++ Zeichen (ASRock B75M-DSG)

Beitrag von „tarekhassan83“ vom 21. März 2021, 23:41

Hello friends

i read the whole post from A to Z

I have the same +++++ error but my PC is :

HP Z620 workstation Xeon E5-1620 v.1

GPU Zotac nVidia 1050 TI 4GB

Ram 16 GB ddr3

In widows 7 or 10 everything goes well, even I boot in windows from Clover
my HD is 2 partions

1- for windows

2- for Hackintosh

So i have EFI hidden partition of course

I can boot UEFI or Legacy as well

bt when i want to install Mac (whatever the [distro](#)) 10 x it gives me the +++++

i made all changes in this post

but no luck

Sorry to write in English, I am from Egypt and I only Arabic and Englsih

Best regards to you all
