

[Sammelthread] MacOS BigSur 11.0 DEV-Beta Erfahrungen

Beitrag von „mitchde“ vom 1. April 2021, 13:15

Bei mir unter Big Sur wird die neue Beta 6 angezeigt - [SIP](#) aus.

Glaube ich zumindest, laut status.

```
iMac:~ andreas$ csrutil status
```

[System Integrity Protection](#) status: unknown (Custom Configuration).

Configuration:

Apple Internal: disabled

Key Signing: disabled

Filesystem Protections: disabled

Debugging Restrictions: disabled

DTrace Restrictions: disabled

NVRAM Protections: disabled

BaseSystem Verification: disabled

This is an unsupported configuration, likely to break in the future and leave your machine in an unknown state.
