

Z490 Vision G with OpenCore - Works like an original iMac20,2 in all aspects

Beitrag von „Blackninja_1985“ vom 7. April 2021, 13:10

Hi Herties,

looks like you do have the same sleep issue I have. There is a way to fix but I was not able to fix it by myself. If you have a solution please let me know.

It is possible to disable the _PRW Methode for the causing port. But I don't know how.

Brs
