In my config patch macos detect my laptop as a monitor intel graphics iris of family 620 630 650...

So i have no problems just the chiffre is not writing in the info macos...

So i have no problems at all it's like using windows 11 or ubuntu 21 04

Intel hd 3000 need simbios 8,2 and me is 16,3 to use opencore legalcy patcher

So i'm so glad

Thank you
