

OC DELL Latitude E6420

Post by “Mo-6420” of Sep 15th 2021, 7:18 pm

for old pc and laptops it'S not a signed because in my windows 11 i use driver like kext in macso the dock is transparent but the screen boot is dark so i desacticate it...

I use driver of system with no problems like macos now

Pic. With and without driver (KEXTS) on windows 11 not supported by microsoft in my dell

For me no difference the system one is better...
