

# MSi Z370 - MAG TOMAHAWK - Olarila Monterey installation IMPOSSIBLE

Post by "Nightflyer" of Sep 22nd 2021, 3:47 pm

[Quote from Quentin-83](#)

IMAGE USED:

- Olarila Monterey Beta 6.raw
- Monterey Beta 6 with EFI folder for chipset series 300, 400 and 500

use the install app from apple, and follow this guide

<https://dortania.github.io/Ope...ig.plist/coffee-lake.html>

Olarila Monterey Beta 6.raw and other [Distros](#) are not supported here
