

Installationspfad

Beitrag von „Hecatomb“ vom 8. Januar 2022, 15:52

enter it under Misc -> Security -> Vault

Can't see macOS partitions

Main things to check:

- ScanPolicy set to 0 to show all drives
- Have the proper firmware drivers such as HfsPlus (Note ApfsDriverLoader shouldn't be used in 0.5.8)
- Set UnblockFsConnect to True in config.plist -> UEFI -> Quirks. Needed for some HP systems
- Set **SATA Mode:** AHCI in BIOS
- Set UEFI -> APFS to see APFS based drives:
 - **EnableJumpstart:** YES
 - **HideVerbose:** NO
 - If running older versions of High Sierra (ie. 10.13.5 or older), set the following:
 - **MinDate:** -1
 - **MinVersion:** -1

Stuck on 0CB:

0cScanForBootEntries

failure - Not Found

Hier die Lösung
