

OpenCore und NVidia Web Driver Problem

Beitrag von „fabiosun“ vom 17. Januar 2022, 15:08

Hi [martinmarsian](#) I think if you have a not native NVRAM you should use a SSDT to emulate it

You could also try to rebuild kext cache after Nvidia drivers installation

I have had the same problemi with my rig (not supported well as yours in HighSierra) with a TitanXp Nvidia GPU
