okay .. so your CPU (i5 5600u) has the same IGPU as mine (HD 5500). Maybe your IGPU needs another IG Plattform ID.

All IG Plattform ID's you will find here:

<https://github.com/acidanthera.../Manual/FAQ.IntelHD.en.md>

down under "Intel HD Graphics 5300-6300 ([Broadwell](#) processors)"

Now you have to try all of these ID (only mobile). Copy these ID's and paste them in your config.plist. Be sure you use the hexadecimal form. For Example for "0x16260000" you have to use "06002616"

Save and restart.
