

# **Bild & USB Hub über USB-C Port der Grafikkarte?**

**Beitrag von „hackmac004“ vom 30. September 2022, 18:57**

I just copied a small folder from external HDD to the desktop with about 1,2MB/s. On a different USB port I have around 120 MB/s.

It also takes a long time untill the HDD appears on the desktop, but this varies as well.

edit: the speed with Usb Stick is normal.
