Ohje Man muss reinfolgen beachten? Achherjee.. has hätte ich mir denken können, aber wie ändere ich diese reinfolge? Bzw, im welchen reinsten hast du das eingestellt ? Mit freundlichen Grüßen Antic

://Edit:

Ich habe jetzt mal den Lilu.kext an erster Stelle getan mit Proopertree. Allerdings hat das absolut keine Wirkung gehabt. Ich kann Bluetooth dennoch nicht starten.. langsam fang ich an zu verzweifeln.... Was mach ich falsch?
