Die Meldung hatte ich auch.

Ich hab dann den Fixum gemacht:

Code

1. `sudo /System/Library/PrivateFrameworks/Seeding.framework/Resources/seedutil fixup`

und danach dann

Code

1. `sudo /System/Library/PrivateFrameworks/Seeding.framework/Resources/seedutil enroll DeveloperSeed`

wenn ich jetzt checke, sieht es so aus:

Code

1. crazycreator@MacProvonAndreas ~ % sudo  
/System/Library/PrivateFrameworks/Seeding.framework/Resources/seedutil current
2. Currently enrolled in: DeveloperSeed
