

OC DELL Latitude E6420

Beitrag von „Mo-6420“ vom 8. September 2023, 10:34

For acceleration of intel graphics hd 3000 and old cpu or old extern graphics, you will never see that in your new macos 11,12,13 and14 because

The opencore patcher only do that not darwin system as the old macos ok don't forget that for me

I use windows, linux and android and i feel the same acceleration no difference between them

Finally, Great thanks to teams of opencore, clover, openintel,...and all masters of macos in the world

You do great jobs

Thank you very much

I just add pic. Of the new opencore 0.9.5 10/09/2023 released few minutes ago
