

Anleitung für Broadcom-WLAN-Patch unter macOS Sonoma

Beitrag von „fabiosun“ vom 9. September 2023, 12:15

[Zitat von MacGrummel](#)

[fabiosun](#) : Clover r_5155 is not running for me, too. May be we need some more Instruction for Settings: YES gives no Start, NO gives no Start, too, or no Broadcom-WLAN if we are throwing out the Ventura SkywalkFamily..

in my opinion we miss only kext correct order declaration

then I think it is a clover boot loader problem

~~I will try to ask @slice for kext order (if it is possible in clover to do this as in opencore) done!~~
