

High Sierra 2023?? Videobearbeitung

Post by “fabiosun” of Sep 10th 2023, 9:19 pm

User has a system with an AMD cpu which needs of some kernel patches

Fix pat patches have problems with Nvidia gpu

It is possible to use a safer fix pat (algrey one) performance will be a problem with it

I leave away from this thought the usual problem using OCLP to patch nvidia GPU

Many glitches and overall it is impossible to use new Cuda drivers with new OS

So, using davinci or premiere pro or similar shouldn't be a great experience
