

MacOS Ventura Blackscreen

Beitrag von „fabiosun“ vom 11. September 2023, 17:26

this is my EFI adapted for your CPU

overwrite yours and take a photo of the bootmenu

in bootmenu press space

then reset Nvram

then choose macOS Installer icon (if you did your USB pen in a right way)

remember..post the photo also of the hang..if you see some verbose lines on screen

backup yours and cross finger 😊
