

Anleitung für Broadcom-WLAN-Patch unter macOS Sonoma

Beitrag von „Phoenix85“ vom 12. September 2023, 16:09

I disabled the Amfi.kext and just used the bootarg and changed the block accordingly to your screenshot.

and I added the revpatch=cputname bootarg.

WiFi is also working again.

fabiosun, again you are my problem solver.

It's finally booting now.

Thank you so much.
