

Anleitung für Broadcom-WLAN-Patch unter macOS Sonoma

Beitrag von „apfel-baum“ vom 25. September 2023, 18:49

[fabiosun](#)

that's the reason for the amfipass.kext, this issue is known since , the first beta of sonoma, it even appears with ventura if you use the amfi_getout_of_myway /amfi=0x80 bootargument.

maybe they have to code an new version of the current amfipass.kext

lg 😊

edit-

maybe remove the bootarg as seen above and instead of them add " **-amfipassbeta** " -if does not work "they" have to work at a new version that maybe works 😊
